A Letter From Your CEO

Hello Everyone,

These last few months were ... shall we say, memorable! While we were able to continue services through the drive-up, curbside, and under the tent, it just was not the same without you. We were sad to be forced to cancel all of the fun events where we get together and everyone is able to talk, mingle and catch up. Coronavirus took away all of our signature events including shred day, annual meeting and the members appreciation day. A common phrase lays down the law: "we are here and it is now." And so we deal with reality head-on as it unfolds. Today, the great news is our 'now' includes a lobby back open and we are 'here' ready to see you in the credit union again! Seeing you brightens our day and fuels our optimism. With that, stay tuned for 2021 when all of the events will be back better than ever.

One could look at the last few months and decide these haven't been the best of times. Looking farther back however, we see even in the face of challenges there has always been a brighter future and a better day tomorrow. Challenges help us grow and adapt, motivate us into action, and force us to take a hard look at what we are doing. Within all of that, is the Blessing of personal growth by living through good times and bad times. We look to the future with optimism, and work with what today gives us for the betterment of ourselves and others. The darkest of times truly help us to appreciate sunny days all the more.

I would like to let you know of some changes we've made to enhance the environment to keep all staff and members safe and healthy. Our air quality has taken a leap forward as we had an air purification system in the building installed that kills viruses and bacteria, while also wiping out pollutants, allergens, and volatile organic compounds. It is not a change you may notice, because there is no special smell to the air, and that seems to stay true even when there are special smells coming in from the great outdoors. We have also taken the standard measures you see elsewhere with sneeze guards, hand sanitizer, etc., so feel free to stop by. We may limit the number of people in the lobby however, when times are busy.

Our best referrals come from You! Please be sure to let your family, friends, and neighbors know about us where they will find the best loan rates in town, and let them know how good it is to be a member.

And finally, if you know any of the volunteers serving on our Board of Directors or Supervisory Committee, please thank them for renewing through another term. We genuinely appreciate these members who donate their time and effort in order to help us with a member's perspective throughout our Governance processes. This is what truly helps us remain *"People Helping People"*.

Sincerely,

Dave

We love that our members bring their 4 legged friends through drive-up. Yes, these fuzzy friends have high expectations! They know there is something just for them!

A Dog's Tale A Happy Tail!

Hey, I know this place!
It's a great place!
I get a treat!

If I stare at the
magic drawer
a treat will come out!

YES! A Treat!
It worked again!
I LOVE my human's
Credit Union!

Air Purification System

The new air purification system was installed in June and has already made a noticable difference in the air quality. Below is detailed information. The system is called needlepoint bipolar ionization, and is used in critical environments such as hospitals and food industry.

According to Business Insider 4-8-2020

Integrated into HVAC systems, the technology utilizes specialized tubes that take oxygen molecules from the air and convert them into charged atoms that then cluster around microparticles, surrounding and deactivating harmful substances like airborne mold, bacteria, allergens, and viruses.

They also attach to expelled breath droplets and dust particles that can transport viruses, enlarging them so they're more easily caught in filters. It's an active process that provides continuous disinfection.

"The ions produce a chemical reaction on the cell membrane surface that inactivates the virus," Philip Tierno, a clinical professor of microbiology and pathology at the NYU School of Medicine, told Business Insider. "It can reduce 99.9% of microbes in a matter of minutes." <https://www.businessinsider.com/bipolar-ionization-could-be-a-secret-weapon-against-covid-19-2020-4?op=1>

Installation of this system demonstrates our Board of Director's commitment to a safe environment for employees and members.

Other Safety Measures

- Sneeze guards have been installed throughout the lobby and offices where members meet with staff.
- Hand sanitizers are found in a variety of places around the building, if you want to use one and don't see it, just ask one of the staff.
- Placement of labels on the floor to remind members to social distance and what the proper distance looks like.
- Staff members will wear a mask when walking in the halls or helping a member.
- Staff members are instructed to stay at home if they have a fever or symptoms.
